Identification of Jammers

REF : K - 1450

1. In response to your memorandum of 19 October 1954 requesting observation and identification of Soviet jammers operating against a certain transmission schedule, assigned two of its located in respectively, the task of monitoring the indicated schedule for a fifteen-day period during November. The local report was received a little over a month ago, as the requestor was advised by phone, and held for transmittal with the complementary report from overseas.

2. The original reports from each of the above-mentioned are attached for your retention. As the reports do not specify the quality of reception of the jamming signals, we are unable to vouch for the completeness of the identifications other than to note that they were reported by competent operators. If any clarifying remarks or observations are required, the request will promptly be relayed to the field.
